
YAMBA MONTHLY ACTIVITY REPORT.

Introduction.

Glory to God! By his grace we have seen March also come to an end. As we have never forgotten to thank whoever is behind our success, we once again take this honour to appreciate Urban promise international, Management, Staff and all well-wishers for the achievements we have so far registered especially in this month of March. (Ebenezer). We pray that God expand our horizons as you keep supporting us. we have been able to carry out several activities including; Sponsor letter writing, School visitation, Farming planting among others. Below is an extended highlight.

1. Sponsor letter writing.

This was one of the major activities conducted during this month of march, glory be to God. This is usually done twice a year especially during festive seasons of Easter and Christmas. Children are given an opportunity to share to their sponsors in regard to festive seasons.

All 54 children wrote letters to their sponsors and have been posted to the update wall I the sponsorship website. Kids become very happy when they make communications to their sponsors trough writing appreciating them for the much love and support rendered to them.

We hope and believe this bridges the distance between kids and sponsors and even enhances deeper relationships between Children and sponsors. These letters are also

an opportunity for our children to develop cognitively as kids actively participate in the activity.

However, during this exercise, some kids have some challenges. For example, some are still infants and are therefore unable to communicate clearly to their friends. Others also lack reading and writing skills due to poor schools they attended before. We thank God that now they are improving.

2. School visitations.

School visitations were the major programme activity conducted in this month of March. We partner with two private schools and several times each school is visited three days in a month. Whenever we visit these schools, children would be engaged in lessons from curriculum.

Our main interest is on four aspects of life that the majority of kids in our community lacks. They include; physical, spiritual, mental and socio- emotional. Throughout this month we fully engaged our kinds in spiritual aspect were different bible text were

shared. We pray that continue using us as his vessel to spread his word to his children. Glory be to God.

3. Seed planting.

Farming. Seeds planting were also successful this month. Following the results from the school visits, it was observed that some of our kids stay empty stomach without breakfast and lunch. We plan to provide breakfast and lunch to our kids to enable them study well at school.

In order to achieve this, we decided to get fully engaged in agriculture. We organised parents and Caregivers for this task and it was great seeing their energy. More so, such an activity was equally helpful in bringing the caregivers together with one mind and a spirit of ownership.

We Glorify God for his work amongst us.
