

**1. YAMBA-PROGRAM: AFTER-SCHOOL.**

**• TAILORING TRAINING ACTIVITY**

Transiting into a transformative world encourages change makers to develop divergent minds. During January school holiday, we have conducted After-School program. Kids were encouraged to participate in a wide range of activities such as reading and literacy, Bible study and engaged some children in extra-

curricular help to improve on their skills formulation. Yamba Childcare based on its empowerment strategy resorted to empower its beneficiaries through knowledge and skills training especially Tailoring. We are too hopeful that this tailoring activity in the long run will help some of our vulnerable children to sustain their living using the little income generated from tailoring. We hope our beneficiaries, got knowledge and skills of they learnt in the After-School program.

**• DISTRIBUTION OF SCHOOL SUPPLIES ACTIVITY.**

Empowering Orphans and Highly Vulnerable Children (OVC's) to acquire education accounts for Yamba's existence. Yamba's leadership believes that education is wealth and such ideology has inspired the non-profit leaders to focus on creating the possible opportunities for enabling kids in the program enjoy their right to education. We thank God that we have been able to solicit money for purchasing the school bags for kids to use in their education. We have distributed over

100 school bags, 120 dozens of books and pens, crayons, and 25 pairs shoes to our kids and prepared them for reporting back to school when their respective schools open.

**2. YAMBA'S PROGRAM: SOCIAL DEVELOPMENT**

**• MUSIC DANCE AND DRAMA ACTIVITY**

Yamba's social emotional development activities participated in January holiday After-School included Story-telling, singing, Games and sports and others. Our Positive social and emotional development has influenced our kid's self-confidence and has increased their ability of esteem to develop meaningful and lasting relationships and a sense of value to those around them.

We hope that our social emotional development has mattered in a way of developing children's brains to learn essential social and emotional skills, develop close, satisfying relationships with other children and adults, and actively explore their environment and learn.

In short, early childhood learning is a critical of development for social and emotional skills. The quality of experiences and relationships during our camp-time has brought life-long implications.

**3. YAMBA'S PROGRAM: FOOD AND NUTRITION.**

**• BACK-YARD GARDENING ACTIVITY**

Fighting malnutrition among children and youth in the community accounts for Yamba's cause of existence. In Yamba community malnutrition has increasingly become a common threat limiting children's growth and has led to stuntedness among kids and youth.

Yamba has laboured for so long to feed children on balanced diet by providing meals full in food values for child growth and development. We hope our feeding program has played a transformative work in the lives of our beneficiaries in terms of physical growth and development.

**4. YAMBA'S PROGRAM: SPIRITUAL GROWTH.**

**• BIBLE STUDY ACTIVITY.**

Devotions are a great place we find inspiration in the spiritual journey. Yamba has greatly made devotions part of their daily lives and this has made them feel their amazing benefits. For example,

Bible Reading has made both staff and beneficiaries to grow spiritually. We

engage our kids to different readings and this has caused them to reflect on the Word of God and encounter thoughtful teaching on important spiritual values. Prayers have also encouraged us to spend time with God. The more we have come closer with God, the more we have understood what he is saying about himself, his kingdom, and his people. The Challenge we have found during implementation of o activity is that, some of our beneficiaries still lack the skills of reading the Bible.

**5. YAMBA'S PROGRAM: HEALTH DEVELOPMENT.**

**• PRIMARY HEALTH CARE.**

Yamba Organization believes that all children, everywhere, have the right to achieve the highest level of healthcare and that makes the fundamental premise of Primary Healthcare (PHC). Yamba considered Primary health care as a society

approach to effectively organize and strengthen its health systems to bring services to children. We are laying strategies to integrate our health services to meet beneficiary's health needs throughout their lives and empowering individuals, families and communities to take charge of their own health is our greatest desire.
